### INTRODUCTION

We thank you for your instructions in this matter.

As requested, we have assessed the above mentioned vehicle to consider the extent of damage and now submit our report for your consideration.

### VEHICLE DESCRIPTION

Please find listed in the Assessment Report a description of this vehicle and note it is a 2016 Kia Rio REGO-531WNN

### NATURE AND EXTENT OF DAMAGE

We confirm the damage sustained to this vehicle is, impact damage sustained to the LH suspension, including but not limited to the steering rack, strut, drive shaft, rim & tyre.

On review of the invoice charges and, based on the damage visible within the digital colour images, in our professional opinion the front LH rim has sustained considerable impact to it, causing the steering rack tie rod end and the lower control arm to bend allowing the drive shaft to become detached from the gear box.

Other components may be damaged as a result of the impact to the rim. The wheel hub damage is hard to see, and it is only when you attempt to complete a wheel alignment that you will be able to ascertain the extent of the damage. It is important to understand that this part is complex and is made of cast iron and not painted so surface rust may be visible but the integrity is sound.

### POTENTIAL ADDITIONAL REPAIRS

Please reserve \$1000 for potential additional repairs. Please refer to the attached for full details.

### AUTHORISATION OF REPAIRS

As per your instructions, our assessment was carried out on a without-prejudice basis. We have not sent a Repair Authority at this time and await further instructions from your office in this regard.

Subject to all required parts being available locally, the estimated time for repairs is 10 business days.

### CONCLUDING REMARKS

We now await further instructions from your office prior to closing our file and submitting a note of our fee. In the meantime should you require further information, please don't hesitate to contact us.
